Salesforce Blitz

RTS labs

What's a Salesforce Blitz?

An intensive four weeks to update your current Salesforce instance to address issues, maximize usability, and add new functionality.

Meet your Salesforce team.

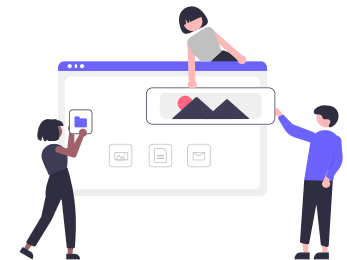

Your RTS labs Salesforce team, including a Salesforce Architect, Salesforce Developer, and Agile Project Manager will execute your project needs in an iterative fashion.

What we'll do.

In the four-week period, RTS will deploy new features and fixes to your Salesforce instance. Throughout the project, you can expect:

- Kickoff: 2 x 2 hour requirements sessions
- Technical review of your existing application
- Weekly review of a backlog of issues and feature requests
- Weekly development of new features and addressing identified issues
- Daily Requirements Clarification meetings with RTS and your team
- Regular updates to a client accessible User Acceptance Testing environment
- Client User Acceptance Testing

What you'll get.

A new and improved Salesforce.

- ☑ Bugs are fixed
- ☑ Features implemented
- ☑ Happy user groups
- ☑ Greater ROI
- ☑ Peace of mind

100 hrs

Requires a minimum commitment
of 100 project hours and a
\$17,500 total investment

Happy customers.

What our customers and
Salesforce partners are saying.

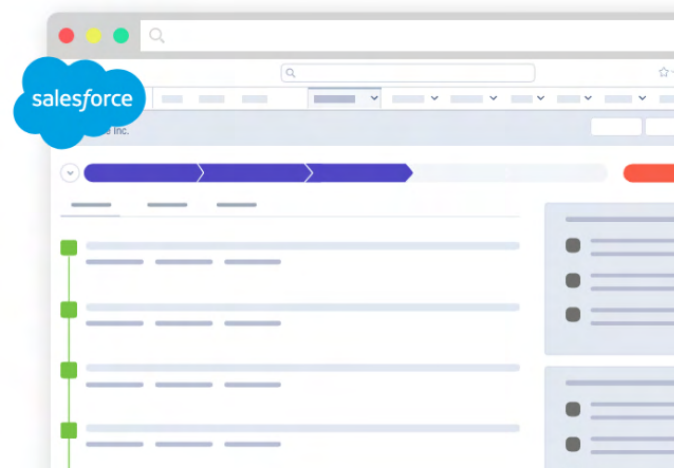

RTS built the most complex and sophisticated security model Salesforce has seen for FSC.

- **Glenn Barth**, SF Portfolio Success

RTS comes up with creative solutions so they are absolutely the people to go to for complicated use cases.

- **Emily Howard**, AE
